O c t a O n e

FEATURES

Standard: BCD 104mm 4 bolts.
Compatibility: 1x11-1x10-1x9 single chainring setups.
Standard SRAM XD Drive 11s chains and also other 9-10-11s chains.
Material: 7075 T6, "hart coating" finishing.

INSTALLATION

1) Position OctaOne directly on the internal side of the crank spider (do not use spacers).
2) Insert the 4 billet fittings into spider holes.
3) Apply grease or mild threadlock (243 Loctite or equivalent) under bolt head and on bolt thread.
4) Tighten at 5-6 Nm 4 standard chainring male bolts.

WARNING

Male chainring bolts must reach internal face of chainring.
Do not use shorter bolts.
